

BLICKMAN

Continuous Always-On Antimicrobial Medical Equipment

from Allied BioScience & Blickman Industries

An Innovative Partnership

Allied BioScience, an Infection Prevention company specializing in continuously active antimicrobial surface coatings, in partnership with Blickman Industries, the market leader in stainless steel and chrome equipment, is proud to offer an innovative product line of continuously protected antimicrobial medical equipment.

Allied BioScience and Blickman share a deep dedication to public health and a mission to help protect patients and reduce illnesses caused by HAIs. This partnership provides a new layer of defense with continuous antimicrobial protection for key medical equipment.

Featured Products

Customers who have come to respect the Blickman brand for over 130 years now have the opportunity for their high-quality medical equipment to be continuously protected from environmental contamination.

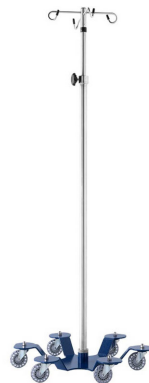

A broad portfolio of Blickman's stainless steel and chrome medical equipment with continuous antimicrobial protection will be available, including Mayo stands, case carts, IV poles, storage cabinets and warming cabinets.
